

Aero 5 centre speaker

- Use of Balanced Mode Radiator (BMR) driver moves traditional tweeter/woofer crossover point far away from the ears' most sensitive region and therefore eliminates the distortions caused by traditional crossover networks and removes timbre differences caused by different materials used for tweeter and woofer
- Balanced Mode Radiator (BMR) driver to seamlessly cover the frequency range from 250Hz to 22kHz, making it perfect for reproducing movie dialogue with the greatest clarity and neutrality
